## WE ARE WHAT WE MAKE

Werk is a boutique graphic design studio specialising in the creation of visual capital – the currency of the eye.

Visual capital is created when the eye spots something that makes it hungry for more. More emotion and inspiration. More information and meaning. It is the capital used to turn something beautiful into something valuable. And it is how visual expressions become lasting impressions.

What kind of capital will your vision create? Contact us to find out.

Werk's areas of expertise include: corporate identity, poster design, typography, mobile graphics and web design.
